<https://www.linkedin.com/in/abdullahiayomide/> | <https://github.com/slyskat/> | <https://main-portfolio-eight-bice.vercel.app/>

**PROFESSIONAL SUMMARY** Front-End Developer specializing in building responsive, performant, and accessible web applications using **React**, **JavaScript (ES6+)**, **HTML5**, and **CSS3**. Passionate about creating reusable **UI components** and efficient **DOM manipulation**. Eager to leverage technical skills to deliver intuitive user interfaces and drive product success in a dynamic engineering team.

## TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3
- **Frameworks & Libraries:** React.js, React Hooks, Context API
- **Tools:** Git, GitHub, Chrome DevTools, Vercel, VS Code, Vite
- **Concepts:** Responsive Design, API Integration, RESTful APIs, Performance Optimization, Component Architecture

## PROJECTS

**Job Board Aggregator** | *React, JSearch API, Vercel* | <https://job-board-aggregator.vercel.app/>

- Architected a full-featured job search platform, integrating **JSearch API** to handle real-time data filtering for thousands of listings.
- Engineered a high-performance filtering system using **Set data structures**, achieving **O(1) lookup time** for complex queries (location, salary, remote status).
- Built a **custom normalization layer** to standardize inconsistent API responses, ensuring 100% UI stability despite variable data structures.
- Designed a fully responsive layout with a collapsible sidebar, optimizing the experience for both mobile and desktop users.

**Learning Tracker App** | *React, Context API, Recharts* | <https://learning-tracker-xi.vercel.app/>

- Architected a centralized state management system using **React Context API**, eliminating prop drilling and streamlining data flow across deeply nested components.
- Implemented client-side data persistence using **localStorage**, ensuring user progress and skill data are retained across sessions without backend dependency.
- Integrated **Recharts** to visualize productivity metrics, developing custom logic to calculate completion percentages and render dynamic, real-time **Pie Charts**.

## PROFESSIONAL DEVELOPMENT

### The Ultimate React Course (In Progress) | *Udemy / Online*

- **Current Focus:** Mastering advanced React patterns, **Redux** state management, and **Performance Optimization** techniques.
- **Upcoming Modules:** Scheduled to learn **Next.js**, **Supabase**, **React Query**, and secure Client/Server Interactions (NextAuth).

### Frontend Mentor & FreeCodeCamp | *Independent Coursework*

- Completed multiple responsive web design challenges, translating Figma designs into pixel-perfect code using modern CSS Flexbox and Grid.
